

An adaptable and versatile candidate, currently studying Software Engineering Technology - Artificial Intelligence. Foundational knowledge of SQL, Python, C#, Java, HTML, CSS, JavaScript and artificial intelligence concepts, such as machine learning, and AI systems design. Familiar with software requirements, system design, use-case diagrams, workflow documentation and web development. Demonstrated teamwork and problem-solving skills through academic group projects, including a study-group matching system and an AI-enhanced library and study system. Experienced in creating a multi-page website using HTML and CSS.

KEY SKILLS

Programming Python C# Java	Web Development HTML CSS JavaScript	Software Concepts Software Requirements System Design Testing/Debugging
AI & Databases Machine Learning AI System Designs SQL & Oracle	Design & Documentation Use-Case Diagrams Flow Diagrams Project Documentation	Tools & Technologies Git/GitHub Visual Studio Code MS Office Suite

EDUCATION

Software Engineering Technology - Artificial Intelligence (Co-op) Advanced Diploma Centennial College, Toronto, ON	Sept.2025 - Present GPA: 4.12 / 4.5 (A)
--	--

<i>Courses:</i> Python Programming C# Programming Java Programming AI Systems Design	Unix/Linux OS Web Interface Design (HTML, CSS) Software Engineering Fundamentals Web Application Development	Database Concepts (SQL) Client-Side Web Development Software Requirements Engineering Statistics & Discrete Mathematics
---	---	--

Bachelor of Business Administration - Finance (Partial Completion) Independent University, Bangladesh, Dhaka, Bangladesh	2020 – 2022
• Completed two years of coursework toward a four-year BBA program.	

SELECT PROJECTS

Smart Study Group Finder - Group Project - Designed a course and section-based system to help Centennial College students find suitable study partners - Proposed student registration, profile creation, group searching, group joining and group-chat features - Contributed to project design, documentation and explanations of major system functionalities
AI-Enhanced Smart Library & Study System - Group Project - Enhanced a study-group matching concept by adding AI-assisted study and library-support features - Designed functions for study-group creation, group joining, room booking and resource recommendations - Support software requirements documentation, use-case descriptions, workflow diagrams and presentation
Colours of Bangladeshi Culture - Individual Web Project - Created a multi-page website using HTML and CSS to present Bangladeshi clothing, festivals and food culture - Developed connected pages including Home, Cultural Topics, Contact, and Sitemap & Credits - Organized information into structured sections and added internal navigation links between webpages

EXPERIENCE

Computer Lab & Academic Support Volunteer

2016 - 2019

Dinajpur Govt. Girls' High School and Dinajpur Govt. College, Bangladesh

- Assisted teachers with basic computer lab tasks and classroom technology support
- Entered and updated student marks and examination results using Microsoft Excel
- Supported typing, data entry and organization of academic records

Private Tutor — Mathematics, ICT & Physics

2019 – 2023

Bangladesh

- Provided one-to-one tutoring in Mathematics, ICT and Physics
- Explained academic concepts clearly and adapted lessons to students' learning needs
- Assisted students with practice questions, assignments and exam preparation

Blood Donation & Community Support Volunteer

2017 - 2019

Dinajpur, Bangladesh

- Assisted with blood donation and community support activities
- Helped with event preparation and participant coordination
- Worked collaboratively with volunteers and participants

University Event Volunteer

2020 - 2022

Independent University, Bangladesh, Dhaka, Bangladesh

- Assisted with student orientation and university events
- Helped welcome and guide new students during campus activities
- Supported event coordination and participant communication
